These individuals participated during the development phase, held online from October 22 to 25, 2024, and have submitted their initial outputs. Due to time constraints and limited participation during the call for developers, assistance was sought from the existing pool of writers from last year's workshop. Their previous involvement and experience in similar activities will ensure continuity and efficiency in the development of materials. Engaging the pool of existing writers is a strategic decision to ensure the timely completion of the workshop, considering the limited time between the release of the memorandum and the conduct of the activity. The writers' prior experience will minimize the need for additional orientation.

The listed participants are expected to attend the finalization workshop. Arrival is required in the morning of November 26, 2024, with the workshop concluding in the afternoon of November 29.

For guidance and strict compliance.

These individuals participated during the development phase, held online from October 22 to 25, 2024, and have submitted their initial outputs. Due to time constraints and limited participation during the call for developers, assistance was sought from the existing pool of writers from last year's workshop. Their previous involvement and experience in similar activities will ensure continuity and efficiency in the development of materials. Engaging the pool of existing writers is a strategic decision to ensure the timely completion of the workshop, considering the limited time between the release of the memorandum and the conduct of the activity. The writers' prior experience will minimize the need for additional orientation.

The listed participants are expected to attend the finalization workshop. Arrival is required in the morning of November 26, 2024, with the workshop concluding in the afternoon of November 29.

For guidance and strict compliance.
